

# WELCOME!

## MEAT YOUR LABEL SUPPLIER

### Meat Processing Labels!

Introducing your new supplier, Bollin Label Systems, who will provide a complete solution for your label challenges with our extensive design and print capabilities. Your new meat labels will stand up to extreme processing conditions, freezing temperatures and contact with moisture during application and storage. Consumer trends have greatly shaped the industry and we also understand that unique-shaped packaging requires unique-shaped labels to match.

Consumer demand for certified organic meat, pasture-raised animals, free-range poultry, grass-fed beef, meat with humanitarian certification and vegetarian fed chickens all impact brand label design, along with strict FDA labeling and adhesive standards on meat packaging.

# Flexographic & Digital Press CAPABILITIES

We're equipped to supply labels for nearly any product, merchandising, or business situation in an ever changing market by allowing you to make adjustments as your needs change. As a result, you will have lower inventory which reduces risk, volume based on the consumer and SKU demand, opportunities to target promotional ideas that reach your targeted customers and many other label solutions to accomplish your goals.

*If your labels will be applied with an automatic applicator please provide applicator specs when you request a quote.*
